

Mightier SPOT Dealing Keyboard

The Mightier MLNM Multi-protocol SPOT Trading Keyboard offer's the versatility and reliability necessary for today's fast moving and ever expanding Trading Floor. The Mightier Keyboard can support up to six different trading platforms including, but not limited to: Reuters Dealing 3000, EBS, Bloomberg, and/or Sun

As well as any standard PC, whether it has serial, PS2 or USB connections. By placing most of the intelligence, i.e. the electronics, in the breakout box that's conveniently located under the desk, the Mightier Keyboard massively reduces the area of unusable desktop by using a much smaller keyboard "footprint" than when using multiple keyboards.

In addition we have also virtually eliminated the requirement of any additional power supply units at the desktop by deriving power from the PC itself, and thereby also avoiding any single point of failure.

After listening to suggestions from our Clients IT Support staff we have redesigned the entire keyboard with ease of installation and quick swap out (due to spillages, etc.) as a major priority. This lead us to use a single "phone jack" style RJ45 connection for the input cable as opposed to the standard "two screw" keyboard connection, thereby speeding up the swap out time and eliminating any need for tools. Between our **Plug and Play** breakout box technology and **Quick Connect** keyboard cable we ultimately reduce the user downtime as well as the dependency on Vendor Support.

Key Benefits:

- Derives power directly from PC's creating multiple power redundancy eliminating a point of failure
- Keyboard is "Hot swappable" allowing IT Techs to replace the Keyboard "on the fly" without having to reboot any of the traders PC's
- Switch box can be cascaded to allow control of up to 10 PC's/ Trading platforms

- Optional Contention Kit allows two traders to share a single PC or Reuters Dealing Workstation while keeping control on their individual Mightier keyboards
- Optional Firmware allows control of multiple Reuter Workstations with a single Mightier Keyboard and Mouse
- Total cost of ownership is on average 40% less then our competitors when taken into account Initial Cost, Moves Adds & Changes, and Support & Maintenance
- Multi-Platform support for Reuters Dealing (with intergraded SPOT Trading Keypad), Sun, PC and USB equipped computers including Bloomberg
- Works parallel with Information Provider proprietary Keypads (i.e. Reuters and EBS)
- Flash upgradeable firmware provides an easy upgrade path for the future
- Supports a very wide range of software including Windows® 3.X, WFWG, 95, 98, 2000, ME, XP, Vista, NT, DOS, Unix, Linux®, Novell®, NetWare®, OS/2, BSD, Solaris, Mac OS (8.6 and higher).
- Dedicated proprietary Reuters, EBS, and Bloomberg function keys. Sun function keys available on Mightier MP Keyboard
- The Breakout Box (located under desk) is "plug and play" with no configuration necessary to the Mightier Keyboard or the PC it's connecting to.
- Dealing "Hotkeys" allow quick workstation connection to help improve trader response time

Mightier SPOT Dealing Keyboard

Further Features:

- Control multiple computers from a single console, including Reuters Dealing
- Conveniently located Individual Port Selection keys with LED indicator lights provides easy port select
- Automatic "seamless" conversion between different hardware platforms
- "Keep alive" feature on Switch Box allows configurations to be kept on one unit using integrated dipswitch configurations
- Automatic detection of the connected hardware
- Continuous keyboard and mouse emulation on all ports ensures problem free computer boot up
- Mouse restoration functions to enable 'hot plugging' of certain systems
- Automatically restores keyboard and mouse states when channel changed
- User options stored in EEPROM memory
- Supports mouse prompt and stream modes for maximum compatibility
- Supports Microsoft IntelliMouse and other common wheel mice
- Power and activity indication confirm correct operation
- Mightier Keyboard, Mouse and Switch Reset may be performed without disconnecting devices
- Supports IBM ThinkPad 'Y' cables
- All ports are active simultaneously - all computers may all be booted at the same time
- Keyboard data flowing through the switch is kept in its "native" format which enables the proprietary keys on a 3rd party KB's to be supported
- Support all models of desktop and laptop PCs, including Bloomberg
- "Accept", "Contact", "I Buy", "I Sell", "Yours", "Mine", "Bid" and "Offer" keys are hotkey's enabling "single press" quick Reuters Workstation selection
- Sturdy Metal base and hard molded plastic cover provides the necessary durability to last in today's trading environment
- Unit can be password protected
- Can be used in conjunction with Biometric peripherals
- Compatible with third party KVM Extenders

Complies with European EMC directive 89/336/EEC. CE marked and FCC class A compliant.
